01 ABOUT

22-year-old developer with passion for designing, developing, and launching platforms for production. I have in-depth knowledge of object-oriented, functional, and reactive programming, and I always strive to create high-quality and efficient solutions. With a strong technical background and a constant desire to learn and grow, I am ready to take on new challenges and contribute with innovative ideas and solutions.

07 PROJECTS

Turnpuu - Company website

Designed and fully programmed the company website using Next.js
Integrated design creativity with technical expertise to optimize user experience.

Sparent - Webshop

Developed a feature-rich webshop for pool products. Implemented search functionality and product filtering for enhanced user experience.

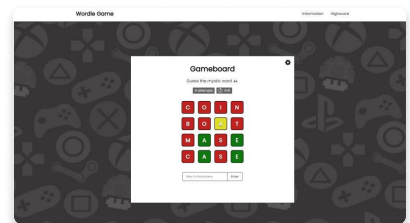

Pet Market - Fullstack app

Developed a fullstack web application using Spring Boot for the backend and Angular for the frontend, aimed at facilitating the buying and selling of pets and pet-related products.

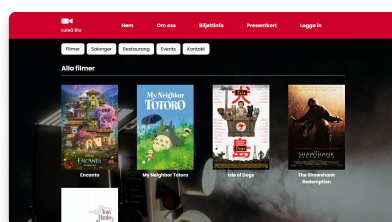

Wordle game - Fullstack app

A React app featuring a game and information page. The Express.js backend serves the React app and provides API routes for game logic and a server-side rendered highscore page using EJS.

Luleå Bio - Nextjs app

A cinema booking website. Users can browse and book movies, with authentication to view their booking history. This app includes REST API, SSR, and E2E tests.

ESC - Hacker Escape Rooms

A static website built with HTML, CSS, and JS, closely following a provided design. The project emphasizes design accuracy, best practices, and a well-structured codebase for maintainability and performance.
